School Climate for LGBTQ+ Students in West Virginia

Findings from the GLSEN 2021 National School Climate Survey demonstrate that West Virginia schools were not safe for most LGBTQ+ secondary school students. In addition, many LGBTQ+ students in West Virginia did not have access to important school supports. Of note, the 2020-2021 school year was unique in that the COVID-19 pandemic caused disruptions to schools across the country, as schools had to adapt in the wake of the pandemic, drastically changing how many students experienced school; in West Virginia, 8% of LGBTQ+ students attended school only in-person, 19% attended only online, and 74% attended school in a hybrid setting.

The vast majority of LGBTQ+ students in West Virginia regularly (sometimes, often, or frequently) heard anti-LGBTQ+ remarks (Fig. 1). Many also regularly heard school staff make homophobic remarks (73%) and negative remarks about someone's gender expression (76%).

Most LGBTQ+ students in West Virginia experienced anti-LGBTQ+ victimization at school (Fig. 2). They also experienced victimization at school based on religion (36%), disability (36%), and race/ethnicity (18%). Most never reported the incident to school staff (63%), and of those who had, only 11% of LGBTQ+ students said that it resulted in effective staff intervention.

Figure 1. Hearing Anti-LGBTQ+ Remarks from Students in West Virginia Schools
(percentage of LGBTQ+ students ever hearing remarks)
Many LGBTQ+ students in West Virginia reported discriminatory policies or practices at their school (Fig. 3).
More than 2 in 3 (70%) experienced at least one form of anti-LGBTQ+ discrimination at school. Figure 3 shows the most common forms of anti-LGBTQ+ discrimination experienced by LGBTQ+ students in West Virginia.

- Many LGBTQ+ students in West Virginia were restricted from LGBTQ+ expression: 38% were disciplined for public displays of affection (PDA) that did not result in similar action for non-LGBTQ students; 22% were prevented from discussing or writing about LGBTQ+ topics in extracurricular activities and 20% in class assignments/projects, 17% were prevented from wearing clothing supporting LGBTQ+ issues, and 5% were disciplined for identifying as LGBTQ+.

- Many LGBTQ+ students in West Virginia experienced discrimination at school related to their gender; 44% were prevented from using their name or pronoun in their school, 39% were prevented from using the bathroom that aligned with their gender, 28% were prevented from using the locker room that aligned with their gender, 29% were prevented from wearing clothing deemed “inappropriate” based on gender, and 27% were prevented from playing on the sports team that was consistent with their gender.

- In West Virginia, transgender and nonbinary students in particular experienced gender-based discrimination, specifically being prevented from: using their chosen name or pronouns (55%), using the bathroom that aligns with their gender (51%), using the locker room that aligns with their gender (38%), wearing clothing deemed “inappropriate” based on gender (33%), and playing on the school sports team that was consistent with their gender (38%).
Many LGBTQ+ students in West Virginia did not have access to in-school resources and supports (Fig. 4).

- Most (95%) could identify at least one school staff member supportive of LGBTQ+ students, but only 39% could identify 6 or more supportive school staff.
- Only 22% of LGBTQ+ students reported that their school administration was somewhat or very supportive of LGBTQ+ students.
- Only 7% were taught positive representations of LGBTQ+ people, history, or events (“inclusive curriculum”), 30% had access to inclusive library resources, and 2% of LGBTQ+ students in West Virginia reported receiving LGBTQ+-inclusive sex education at school.
- Only 3% of LGBTQ+ students attended a school with a comprehensive anti-bullying/harassment policy that included specific protections based on sexual orientation and gender identity/expression. Only 2% had a policy or official guidelines to support transgender and nonbinary students.
- Only 8% had access to a GSA or similar student club which provides a safe and affirming space and promotes a more welcoming school climate for LGBTQ+ students.

RECOMMENDATIONS

Findings from the 2021 National School Climate Survey demonstrate that students attending schools with affirming LGBTQ+ resources and supports report more positive school experiences, including lower victimization and absenteeism, and higher academic achievement.

Given the high percentages of LGBTQ+ students in West Virginia who experience harassment at school, and the limited access to key resources and supports, it is critical that West Virginia school leaders, education policymakers, and other individuals who are obligated to provide safe learning environments for all students take the following steps:

- Implement supportive and inclusive school policies, such as comprehensive anti-bullying/harassment and supportive transgender and nonbinary student policies;
- Support GSAs;
- Provide professional development for school staff on LGBTQ+ student issues; and
- Increase student access to LGBTQ+-inclusive curricular resources.
Details on West Virginia’s current status regarding the adoption of the above recommendations can be found on West Virginia’s Policy Score Card, located at maps.glsen.org/state-policy-scorecards/. Adopting the above mentioned resources and policies can move us toward a future in which all students in West Virginia will have the opportunity to learn and succeed in school, regardless of sexual orientation, gender identity, or gender expression.

ABOUT THE RESEARCH
In 2021, GLSEN conducted the eleventh National School Climate Survey, a biennial survey of the experiences of LGBTQ+ youth in U.S. secondary schools. The national sample consisted of 22,298 LGBTQ+ students from all 50 states, the District of Columbia, Puerto Rico, American Samoa, and Guam. A total of 174 respondents were attending schools in West Virginia. The West Virginia sample was 2% AAPI (Asian American/Pacific Islander), 2% Black, 6% Latinx, 1% MENA (Middle Eastern and North African), 4% multiracial, 0% Native or Indigenous, and 87% White. The gender composition was 31% cisgender, 26% transgender, 3% nonbinary or genderqueer, and 6% questioning. 97% attended public schools and 3% attended a religious-affiliated school. The school community makeup was 65% rural/small town, 21% suburban, and 14% urban. The results reported for West Virginia had a margin of error of +/- 7%.
